Sweet Corn Co-Product

Sweet Corn Seconds is a by-product of food manufacturing, used in summer as a highly palatable feeding option. Typically used in both dairy and drystock farms from mid-January until early April. Naturally high in digestible energy and moderate Rumen degradable protein, Castlegate James Sweet Corn provides a high value feed supplementing grass during summer months.

Feeding guide

Sweet Corn is only suitable for ad-lib feeding when Castlegate James guide lines are followed. Total dietary levels of starch and soluble sugars, NDF and effective fiber should be monitored when feeding Sweet Corn. To discuss feeding levels further please call the Castlegate James Key Account Manager in your area.

All information is presented in good faith and to the best of our knowledge and resources; however variation in values and outcomes of feeding this product may occur.

Castlegate James Sweet Corn can be fed straight to dairy cows and is suitable for feeding on a feed pad or direct into a paddock for grazing. High palatability and solid sugar levels delivers great energy complementary to the summer grazing season. Ideally stored in a bunker, sweet corn can be tipped directly into a Pit or paddock, Castlegate James Sweet Corn has a shelf life of between 8-14 days.

Availability

Sweet Corn feed is availability only seasonally and typically runs from January through to Mid April.

As such your Castlegate James representative will set up an allocation to ensure consistent, fresh supply of product to optimise all feed coming on farm. Castlegate James Sweet Corn is a perfect companion feed to be fed alongside pasture or any other feeds you have on farm. They can also be used to extend pasture as a direct replacement if required.

Additional notes

This information should be used as a general guide only. Please ask your CJNZ Key Account Manager about a diet appropriate for your farm and herd needs.

This product does not contain restricted animal material and is safe for lactating animals.

Castlegate James Sweet Corn Co-Product is a safe super palatable feed, naturally high in digestible energy and moderate rumen degradable protein.
