Suitable for:

Feeding Castlegate James Soybean Meal to dairy cows is a viable option to increase milk production by providing large amounts of bypass degradable protein.

Soybean Meal

is the base product for numerous dairy rations around the world. With excellent amounts of protein and energy in meal form, this product is ideal for your silo blends. Soybean meal is produced as a byproduct of the soy oil manufacturing. Highly prized for its good amino acid profile like lysine, this palatable, low-starch product is very high in bypass degradable protein, B & D vitamins, phosphorus but also low in fibre.

Feeding guide

Please consult with your local CJNZ Key Account Manager or your nutritional advisor about recommended feed rates. We suggest you ensure proper transition over an extended period and offer access to quality fibre. We also strongly encourage you to ensure fresh water access at all times.

All information is presented in good faith and to the best of our knowledge and resources; however variation in values and outcomes of feeding this product may occur.

Availability

Can be purchased on a contract bases or on the spot market as a one off load. Consult your local CJNZ rep for the best option to suit your needs.

Additional notes

This information should be used as a general guide only. Please ask your CJNZ Key Account Manager about a diet check or consult with your nutritional advisor to determine the appropriate needs for your animals.

This product does not contain restricted animal material. And is safe for lactating animals
